Examination:

- Paragraph Questions, including interpretation of a profile. Pass mark is 75%

Who should attend:

- Psychologists registered with the HPCSA with appropriate training and background in psychopathology.

Course Overview

The MMPI-2 instrument remains the most widely used and widely researched test of adult psychopathology. Used by clinicians to assist with the diagnosis of mental disorders and the selection of appropriate treatment methods, the MMPI-2 test continues to help meet the assessment needs of mental health professionals in an ever-changing environment.

Due to its long construction and ongoing validation, the MMPI-2 is useful in settings where objectivity and accuracy may be particularly important (e.g. forensic assessments and placement in high risk occupations).

Outcomes:

- Minnesota Multiphasic Personality Inventory-2™ (MMPI-2™)
- Minnesota Multiphasic Personality Inventory-Adolescent™ (MMPI-A™), which helps identify personal, social, and behavioural problems in adolescents.

Trainer:

- Kempie van Rooyen, Clinical Psychologist
