Overview

The Advanced Team Development workshop draws on decades of research and the experiences of practitioners who have successfully used the MBTI® instrument in their consulting, training and coaching with teams.

High performance teams come in many shapes and forms with the common ingredient being effective interactions between team members. The MBTI® instrument continues to offer those practitioners working with teams key practical and long lasting insights for optimising team performance.

The workshop environment also offers participants a unique opportunity to interact, learn and exchange experiences with other MBTI® certified practitioners who are applying personality type within their organisations.

Participants in the workshop will learn how to:

- Explore team strengths and blind spots
- Help leaders and teams work together effectively
- Improve intra- and inter-team communications
- Manage change processes
- Enhance team decision making and problem solving
- Support teams in the formulation and actioning of their learning from team development activities
